

Adobe Photoshop Lightroom Classic (PSCC) is an image editing software program for professional photographers, photo enthusiasts, and video editors. It improves workflow by automatically sorting photos according to the applied settings, categorizing images into albums, and using metadata to identify photographs without human intervention. This makes it easy to search for specific types of photos or use specific keywords (such as "mountains" or "dogs") when searching for images. PSCC also removes noise from images, adjusting exposure and sharpening them back up with larger areas of detail retained in them. This patch will update your copy of PSCC 2018 to version 7.2.0. 10 Included in this patch: Reorganization of the menu structure. Localized date and time formatting. Support for cameras using the X-Trans sensor from Fujifilm, including the Fujifilm X-T3. Support for additional Fujifilm cameras, including the Fujifilm X-A5, X-T100, and X100F. Support for additional Pentax cameras, including the K-1 Mark II. Support for additional Nikon cameras, including the D3500 and D850. Support for additional Olympus cameras, including the E-M1 Mark II. The Media Browser has been updated to version 3.2.3 which improves import reliability when importing from RAW files to a catalog under certain circumstances. For several reasons, it is recommended that people update their installers if you have a previous version installed to the latest versions before installing this patch. This will ensure that this patch will work properly after installing it. Also, I have not tested this patch with a previous version of PSCC installed on the same computer so I cannot guarantee that it will work. The instructions will show you how to make sure your installers are up to date and how to quickly install the patch. If you have not installed PSCC 2018 yet, then simply copy the patch into the desired installation directory and run it. If you already have PSCC 2018 installed on your computer, then before running this patch please follow these instructions to ensure that it will work after installing it:

Before running this patch, please check whether or not you have any previous versions of the Lightroom Classic CC Pre-Release 2015/2016/2017/2018 installer installed on your computer. If so, please uninstall them using these instructions . After uninstalling them, proceed with updating your installers by following these instructions . If you have a previous version of PSCC already installed on your computer, then before running this patch please follow these instructions to ensure that it will work after installing it:
